

2. Remove the gauge, bezel spacer, and lens from the clock panel.

3. Using the supplied 6-32 x 3/8" screws, attach the factory spacer to the stand-offs.

4. Attach the clock to the clock panel using the three factory screws from disassembly.

5. Connect the clock harness to the back of the clock. Route the other end of this harness to the HDX control box.

6. Reinstall the assembly in to the dash and refer to the Operation Manual to complete the clock setup.
