

SGI-17 Tachometer Buffer

This buffer will help to eliminate “ignition noise” caused by a tachometer signal from the negative side of an ignition coil. The output will be a 0-12V square wave. Install as close to the ignition source as possible.

Wiring color code of converter:

- RED - 12V power.
- BLACK - Ground.
- WHITE - Tach signal from ignition system.
- YELLOW - Output to Tachometer.

⚠WARNING: This product can expose you to chemicals including lead, which is known to the State of California to cause cancer and birth defects or other reproductive harm. For more information go to www.P65Warnings.ca.gov
