Dakota Digital GRFX Instrument Installation
For 1967-'72 Chevy Pickups

Your new GRFX-67C-PU kit includes:

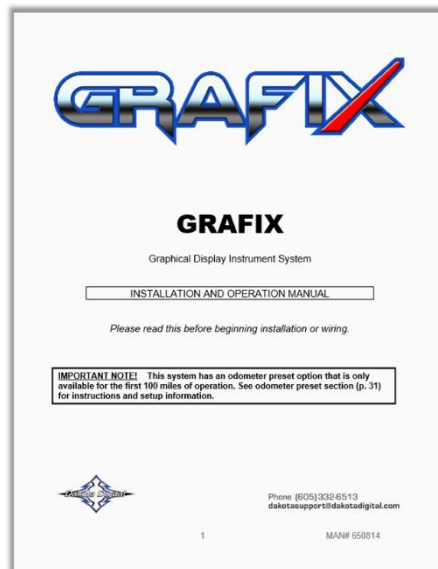

GRFX Display

Universal Sender Pack

Installation Manuals

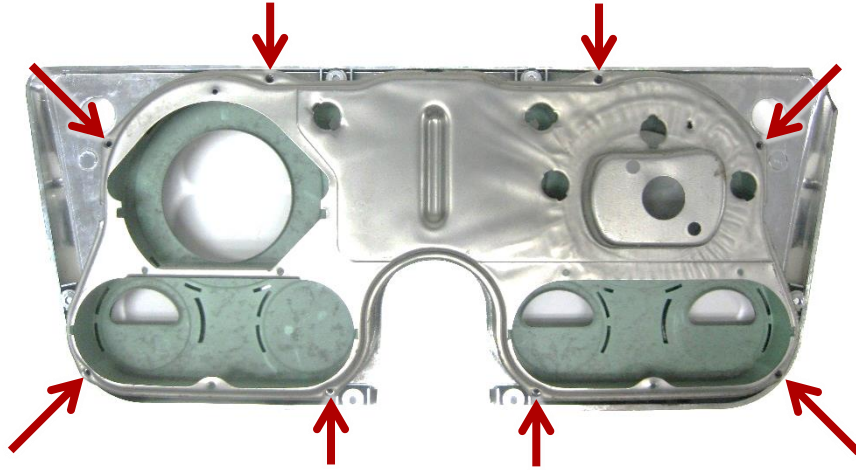

Control Box

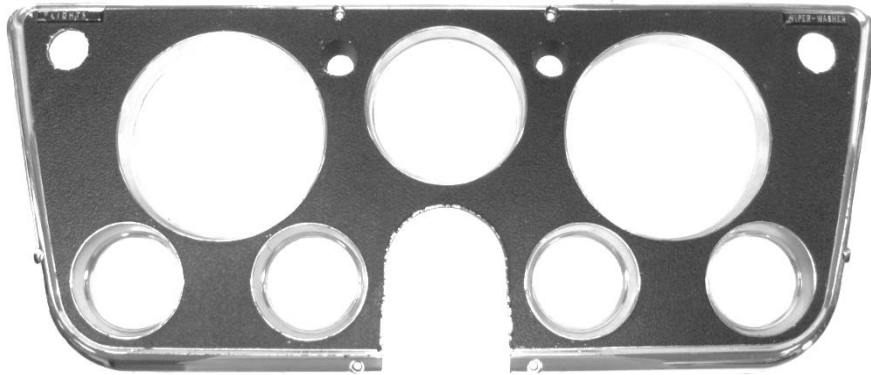

36" Main Harness

Installation

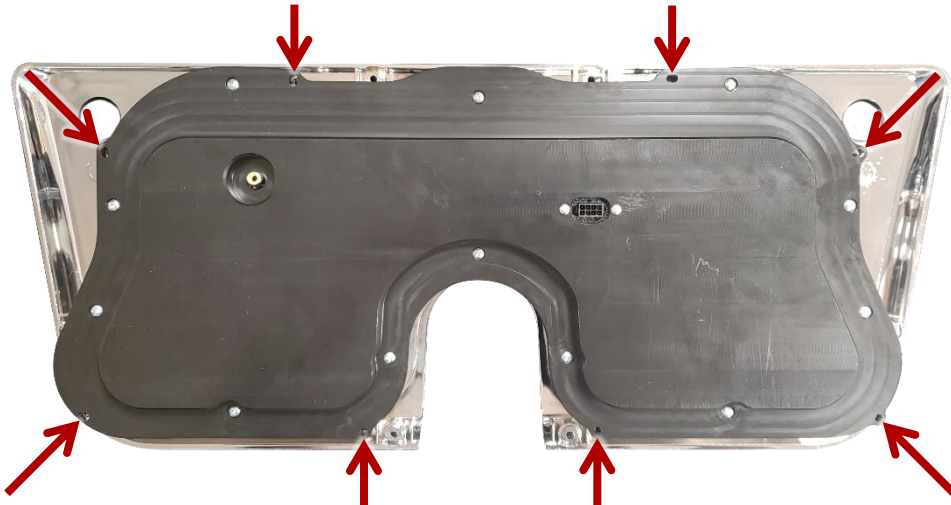

1. Remove the stock gauges from the dash. Remove the eight screws holding the gauges to the bezel on the back of the system. These screws will be used to secure your GRFX system in the stock bezel.

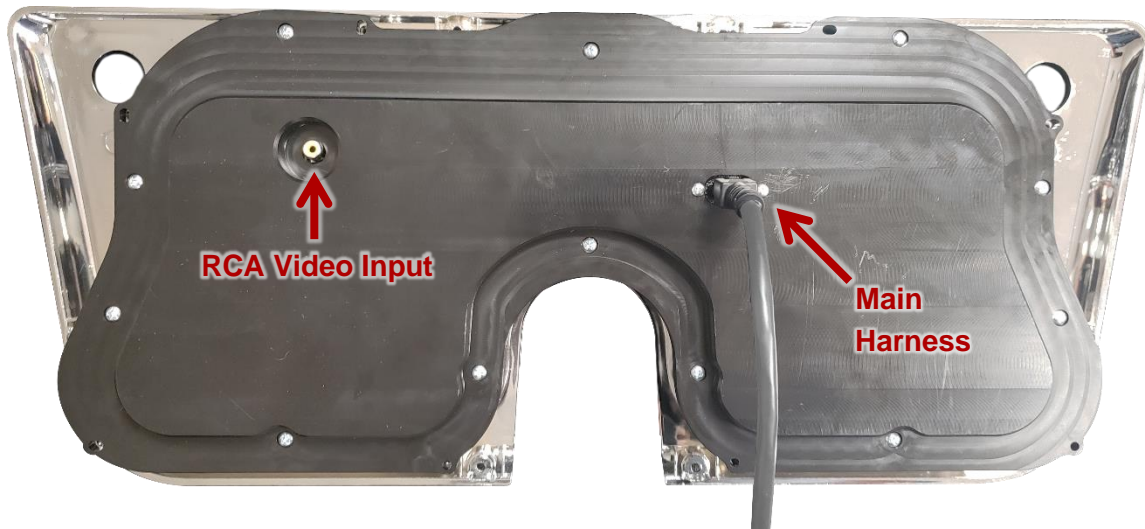

2. Remove the stock gauges, separator plate, and lens from the bezel. The only item to be reused is the original front bezel; the other pieces can be set aside. Now is a good time to clean the bezel and remove any dirt or old lens gasket material.

3. Secure the GRFX system to the bezel with the eight screws removed from the stock gauges.

5. Connect the provided **36" Main Harness** to the back of the GRFX system. If desired, a backup camera can also be connected to the provided RCA input.

6. Re-install the gauge panel into the dash using factory hardware and refer to the Main GRFX Manual for wiring instructions to complete the installation.
