RTX Display

Universal Sender Pack

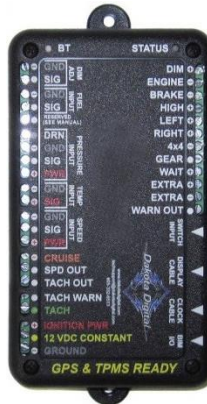

Buzzer

Main Harness (2)

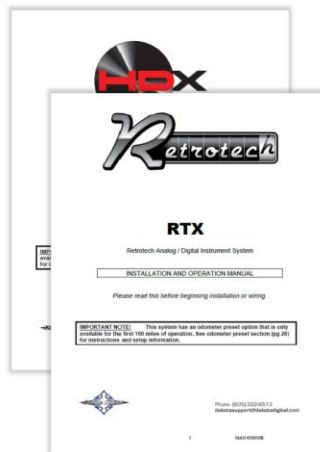

Control Box

Interconnect Harness

HDX/RTX Manual

Y Harness

Clock Harness

Switch Assembly

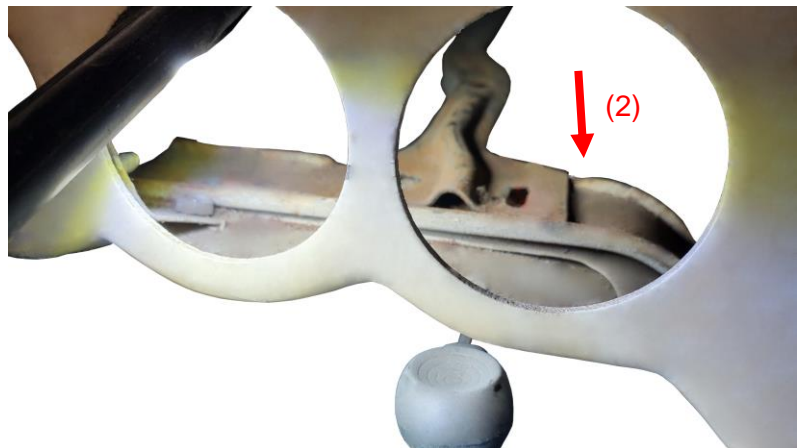

RTX ONLY

Installation

1. Remove the original instruments from the dash. This can be done by removing the two nuts attaching each gauge to the factory mounting studs behind the dash. Retain these nuts for installation of the new HDX or RTX system.

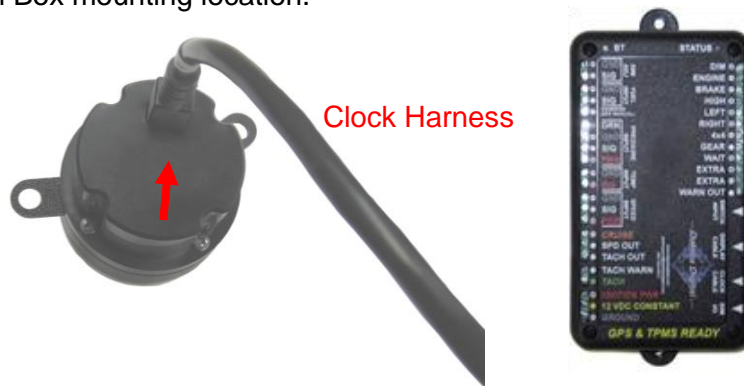

2. Secure the new HDX/RTX Instruments to the dash re-using the original nuts (1) from step one. In case of excess tightness, some trimming or grinding on the bottom of the reinforcing bracket (2) may be necessary to fit the instruments in the dash.

5. Connect the Main Harness routed to the speedometer in step four. The provided Buzzer may also be connected (optional, for audio feedback).

6. Connect the provided Clock Harness to the back of the system's clock. Carefully route the other end to the Control Box mounting location.

7. Refer to the Main Manual for wiring instructions to complete the HDX or RTX installation.
